AI for All - Session 2 - Your 24/7 Marketing Intern

Model Agnostic "Deep Research" Master Prompt

Instructions for the User: *Fill in the bracketed information and upload your ICP document if you have one.*

First: Select the Deep Research Option and Model

Paste the Prompt below and add your specifics shown in the [ ] and highlighted in Yellow:

"Act as a Senior Growth Strategist and Market Researcher. Conduct a Deep Research analysis for my business based on my website: **[Insert URL]** and these details: **[Insert brief description/location]**.

Context & Constraints:

- **[Select one: I am a solo entrepreneur / We are a micro-business with X employees / We are a small non-profit with limited volunteers]**.
- My marketing budget is **[Insert: $0 / Minimal / Moderate]**, and I can only dedicate **[Insert: X hours]** per week to marketing. The strategy must be realistic for these constraints.
- **[Optional: I have attached my existing Ideal Customer Profile (ICP). Please use this as the foundation for your research. / If no ICP is attached, please generate one as part of Phase 2.]**

Phase 1: Market Intelligence

1. Perform a competitive landscape analysis of the St. Albert/Greater Edmonton area. Identify 3 primary competitors and their strengths/weaknesses.
2. Identify current market headwinds and tailwinds (economic, social, or technological) affecting micro-businesses in this sector.

Phase 2: Ideal Customer Profile (ICP) Refinement If I provided an ICP, please audit it against your market research and suggest 3 high-impact refinements. If I did not provide one, define a high-fidelity ICP including their 'Jobs to be Done,' pain points, and where they spend their

attention online.

Phase 3: Strategic & Tactical Marketing Plan (30/60/90 Day) Create a marketing plan that adheres to Canadian Anti-Spam Legislation (CASL). Include:

- **30 Days (Foundations):** Technical setup and initial AI-assisted content pillars.
- **60 Days (Traction):** Lead generation tactics and community engagement.
- **90 Days (Scale):** Sustainable automation and performance review.

Provide the report in a professional executive-summary format with a prioritized list of 'Next Steps'."

Why this works for St. Albert Businesses:

- **The Constraint Clause:** Prevents the AI from recommending "hire a social media manager" to a solo entrepreneur with zero budget.
- **CASL Awareness:** Crucial for Alberta-based businesses to avoid heavy fines and build trust through "Permission Marketing."
- **Executive Summary:** Busy owners don't have time for 50-page reports; they need the "forest and the path through it."
